Subject: RE: Rico Tracer Test?

Sounds good Steve,

If you change your mind or would like to increase the scope for this trip let me know, currently I have the following outlined so far for this trip:

- Mobilize 5/27
- On Site the morning of 5/28/2015
- Assist with mine entry on 5/28
- Bring equipment for:
 - Checking pH of the pool
 - Split water sampling for Total and Dissolved Metals from pool (any additional samples in mind?)
 - Do you need radios for the entry?
 - Tentative: tracer test
- Demobilize 5/29 or over weekend based on any other site needs.
- Would you like documentation of the current treatment system construction status?

Let me know if there is anything else you would like to see for this visit.

Thanks,
Elliott

Elliott,

For now, just you and we can see what Jan s plans are later in the season. If we need coverage there while you're in Silverton, you can work out a detour to orient your replacement.

As for the tracer, I haven't confirmed that AR is up for this.

Steve

Hi Steve,

I plan to be on site and will work on the tracer test equipment, do you think it would be good to have an additional START on site (in addition to myself) for assistance and to introduce then to the Rico site as a backup for any site visits I will not be able conduct this field season while at Red and Bonita? If you have any questions feel free to call or email me.

Thanks,
Elliott

Jan - it's possible we'll do the tracer. Yes, Elliot should plan to be there. We may collect a split so that we have data sooner than later.

Thanks,

Steve

Hi, Steve.

Do you see the possibility of starting a dye trace test in the Argentine Tunnel during your next site visit on May 28? If so, let us know so we can see if the PTSA is still at the warehouse, check on the fluorometer, test to make sure the dye is still effective, test the fluorometer, and write a quick plan based on the 2011 plan.

Do you still want Elliott at the site visit on May 28? Is there anything in particular he should be prepared to do? It sounds like AR will provide sampling equipment.

Jan
